

Fotobeam de 10 a 100 metros dc 24v ip65 Dahua dhi-hy-bd1

## Descripción

### Technical Specification

|                                       |                                                           |
|---------------------------------------|-----------------------------------------------------------|
| Working Voltage                       | DC24V                                                     |
| Current                               | Monitoring current: ? 0.5mA<br>Operating current: ? 0.9mA |
| Max. Optical Path Direction Deviation | ±0.5°                                                     |
| Optical Path Length                   | 10 m-100 m                                                |
| Storage Temperature                   | −10°C to +55°C (+14°F to +131°F)                          |
| Operating Humidity                    | ? 95% RH (no condensation)                                |
| Color                                 | White                                                     |
| Dimensions                            | 117 mm × 152 mm × 85.5 mm (4.61? × 5.98? × 3.37?)         |
| Protection                            | IP65                                                      |
